

● Type And Meaning

S-LA8 series assisted contact group of side hangs type has a constant close, a constant open and two constant open, when it combines with the contactor and relay of the contactor type, the number of the assisted contacts will be enlarged.

The above assisted contact group has the same function to the S-LA1-DN、S-LA8-DN, and they can interchange for using.

- Its technical parameters and normal working condition is the same to S-CA2 relay of the contactor type and S-LC1 assisted contacts)

- (Terminal son sign and wiring diagram)
